European Technical Assessment

ETA 24/0641
of 26/09/2024

Technical Assessment Body issuing the ETA and designated according to Article 29 of the Regulation (EU) No 305/2011: UL International (Netherlands) B.V.

Trade name of the construction product

SOUDACOMPOUND FR

Product family to which the construction product belongs

Fire Stopping and Sealing Product:
• Penetration Seals

Manufacturer

Soudal N.V.
Everdengengenlaan 18-20
Turnhout,
Belgium

Manufacturing plant(s)

A/003

This European Technical Assessment contains

99 pages including 1 Annex which forms an integral part of this assessment.

This European Technical Assessment is issued in accordance with regulation (EU) No 305/2011, on the basis of

EAD 350454-00-1104, September 2017.

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document and should be identified as such.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full. However, partial reproduction may be made, with the written consent of the issuing Technical Assessment Body. Any partial reproduction has to be identified as such.

	ANNEX B – Air Permeability – SOUDACOMPOUND FR	98

I. **SPECIFIC PARTS OF THE EUROPEAN TECHNICAL ASSESSMENT**

1 **Technical description of the product**

- 1) SOUDACOMPOUND FR is a gypsum based mortar material, used to reinstate the fire resistance performance of wall and floor constructions where they have been provided with apertures for the penetrations of multiple services.
- 2) SOUDACOMPOUND FR is supplied as a dry material and is mixed with water to the required ratio prior to installation.
- 3) SOUDACOMPOUND FR when mixed is self-supporting in a wall and floor orientation and may be used with or without a permanent mineral fibre backing material depending upon the require application and classification (see Annex A).
- 4) Soudawrap FR and Soudagum FR CP are required to be used in conjunction with SOUDACOMPOUND FR depending upon the required application and classification (see Annex A).
- 5) The applicant has submitted a written declaration that SOUDACOMPOUND FR does not contain substances which have to be classified as dangerous according to Directive 67/548/EEC and Regulation (EC) No 1272/2008 and listed in the "Indicative list on dangerous substances" of the EGDS - taking into account the installation conditions of the construction product and the release scenarios resulting from there.

In addition to the specific clauses relating to dangerous substances contained in this European Technical Assessment, there may be other requirements applicable to the products falling within its scope (e.g. transposed European legislation and national laws, regulations and administrative provisions). In order to meet the provisions of the Construction Products Regulation, these requirements need also to be complied with, when and where they apply.

- 6) The use catagory of SOUDACOMPOUND FR in relation to BWR 3 (Hygiene, health and environment) is IA1, S/W2

2 **Specification of the intended uses of the product in accordance with the applicable European Assessment Document (Hereinafter EAD): EAD 350454-00-1104: 2017**

Detailed information and data is given in Annex A.

- 1) The intended use of SOUDACOMPOUND FR is to reinstate the fire resistance performance of flexible wall, rigid wall and floor constructions where they are penetrated by various cables, trays and metallic, plastic and composite pipes.
- 2) The specific elements of construction that the system SOUDACOMPOUND FR may be used to provide a penetration seal in, are as follows:
 - a. Flexible walls: The wall must have a minimum thickness of 100 mm and comprise steel studs or timber studs* lined on both faces with minimum 2 layers of 12.5 mm thick boards. Flexible wall solutions may also be used in rigid walls, with a minimum density of 350 kg/m³.
 - b. Rigid walls: The wall must have a minimum thickness of 100 mm and comprise concrete, aerated concrete or masonry, with a minimum density of 650 kg/m³.
 - c. Rigid floors: The floor must have a minimum thickness of 100 mm and comprise aerated concrete or concrete with a minimum density of 650 kg/m³.

* no part of the penetration seal may be closer than 100 mm to a stud, the cavity must be closed between the penetration seal and the stud, and minimum 100 mm of insulation of class A1 or A2 according to EN 13501-1 must be provided within the cavity between the penetration seal and the stud.

The supporting construction must be classified in accordance with EN 13501-2 for the required fire resistance period.

Soudal N.V. Fire Protection Systems which involve services penetrating both sides of a flexible wall may also be used in the situation where the services penetrates one side of the wall only and the remaining side of the wall is not penetrated at the same point (i.e. the services continues on the inside of the wall). All fire integrity and thermal insulation ratings for such single-sided penetrations remain the same as for the equivalent double-sided penetration.

Where a backing material is described in Annex A, this can be replaced with SOUDACOMPOUND FR if the total seal depth is the same or greater.

- 3) The System SOUDACOMPOUND FR may be used to provide a penetration seal with cables, cable trays, plastic pipes, composite pipes and metallic pipes with and without insulation, with mixed services in the same seal/aperture (for details see Annex A).
- 4) The system SOUDACOMPOUND FR may be used to seal apertures in the separating element up to 2400 mm wide by 1200 mm high in a wall, and 2400 mm by 1200 mm in a floor. The additional sizes that are permitted in floors are:

Width (mm)	Length (mm)
1100	2900
1000	4000
900	7000
≤ 800	∞ (infinite)

The minimum permitted separation between adjacent seals/apertures is 100 mm. Services within the system SOUDACOMPOUND FR seal do not require a minimum separation, except where specifically detailed in Annex A.

- 5) Services in floors shall be supported at maximum 450 mm from the top face. Services in walls shall be supported at maximum 270 mm from both faces of the wall.
- 6) Where minimum 100 mm depth of the system SOUDACOMPOUND FR is described in Annex A, this can be reduced with 50 mm if a 50 mm high 45 ° angled cone made of mortar is added around services. If the reduction reduces the thickness to less than 100 mm, a stone wool backing board is required, as specified in Annex A.
- 7) An aperture with or without penetrating services, fire sealed with the system SOUDACOMPOUND FR, can include a steel sleeve casted or friction fitted within rigid constructions. The sleeve must be protected against corrosion before adding the mortar seal.
- 8) Where single sided top face seals are described in Annex A, these can also be used in composite floors (e.g., concrete filled, steel trapezoidal decking) if the floor thickness supersedes the required mortar thickness.
- 9) Services through the system SOUDACOMPOUND FR may be used in all angles between 90° and 45° in all directions, subject to metallic pipes only.

- 10) Where PVC pipes are mentioned in Annex A, this includes PVC-U, PVC-C and similar if the pipe is according to EN 1329-1, EN 1452-2, EN 1453-1¹ and EN 1566-1. Where PP pipes are mentioned in Annex A, this includes PP-MV, PP-H, PP-R and similar if the pipe is according to EN 1451-1 or DIN 8077/8078. Where PE pipes are mentioned, this includes PE-LD, PE-MD, PE-HD, PE-X and similar according to EN 1519-1, EN 12201-2 or EN 12666-1, ABS according to EN 1455-1 and pipes made from SAN+PVC according to EN 1565-1.
- 11) The provisions made in this European Technical Assessment are based on an assumed working life of the SOUDACOMPOUND FR of 25 years, provided that the conditions laid down in the manufacturers datasheet and instructions for the packaging/transport/storage/installation/use/repair are met. The indications given on the working life cannot be interpreted as a guarantee given by the producer but are to be regarded only as a means for choosing the right products in relation to the expected economically reasonable working life of the works.
- 12) Type Z₂: Intended for uses in internal conditions with humidity lower than 85 % RH excluding temperatures below 0°C, without exposure to rain or UV.

3 Performance of the product and references to the methods used for its assessment

Product-type: Mortar		Intended use: Penetration Seal
Assessment method	Essential characteristic	Product Performance
BWR 2 Safety in case of fire		
EN 13501-1	Reaction to fire	Class 'A1'
EN 13501-2	Resistance to fire	Annex A
BWR 3 Hygiene, health and environment		
EN 1026	Air permeability	Annex B
EAD 350454-00-1104, Annex C	Water permeability	No performance determined
Declaration of manufacturer & EN 16516	Release of dangerous substances	Use categories: IA1, S/W2 Declaration of manufacturer
BWR 4 Safety in use		
EOTA TR 001:2003	Mechanical resistance and stability	Suitable for use in walls and floors in Zone Types I, II, III & IV*
EOTA TR 001:2003	Resistance to impact/movement	
EOTA TR 001:2003	Adhesion	
EAD 350454-00-1104, Clause 2.2.9	Durability	Z ₂
BWR 5 Protection against noise		
EN 10140-1,2,4,5/ EN ISO 717-1	Airborne sound insulation	Rw 48 (-1;-3) dB
BWR 6 Energy economy and heat retention		
EN 12664, EN 12667, EN 12939, EN ISO 8990, EN ISO 6946, EN ISO 14683, EN ISO 10211, EN ISO 10456	Thermal properties	No performance determined
EN ISO 12572, EN 12086, EN ISO 10456	Water vapour permeability	No performance determined

*At dimensions up to those given in 2 4) and with soft and hard body impact

4 ASSESSMENT AND VERIFICATION OF CONSTANCY OF PERFORMANCE (HEREINAFTER AVCP) SYSTEM APPLIED, WITH REFERENCE TO ITS LEGAL BASE

According to the decision 1999/454/EC – Commission Decision of date 22nd June 1999 on the procedure for attesting the conformity of construction products pursuant to Article 20(2) of Council Directive 89/106/EEC as regards fire stopping, fire sealing and fire protective products, published in the Official Journal of the European Union (OJEU) L178/52 of 14/07/1999, (see <https://eur-lex.europa.eu/oj/direct-access.html>) of the European Commission¹, as amended, the system(s) of assessment and verification of constancy of performance (see Annex V to Regulation (EU) No 305/2011) given in the following table(s) applies (apply).

Product(s)	Intended use(s)	Level(s) or class(es)	System(s)
Fire stopping and Fire Sealing Products	For fire compartmentation and/or fire protection or fire performance	Any	1

5 Technical details necessary for the implementation of the AVCP system, as provided for in the applicable EAD

Tasks of the manufacturer:

Factory production control

The manufacturer shall exercise permanent internal control of production. All the elements, requirements and provisions adopted by the manufacturer shall be documented in a systematic manner in the form of written policies and procedures, including records of results performed. This production control system shall ensure that the product is in conformity with this European Technical Assessment.

The manufacturer may only use initial / raw / constituent materials stated in the technical documentation of this European Technical Assessment.

The factory production control shall be in accordance with the Control Plan of 25th June 2024 relating to the European Technical Assessment ETA 24/0641 issued on 26/09/2024 which is part of the technical documentation of this European Technical Assessment. The "Control Plan" is laid down in the context of the factory production control system operated by the manufacturer and deposited at UL International (Netherlands) B.V.

The results of factory production control shall be recorded and evaluated in accordance with the provisions of the Control Plan.

¹ Official Journal of the European Communities L178/52 of 14/7/1999

Other tasks of the manufacturer:

Additional information

The manufacturer shall provide a technical data sheet and an installation instruction with the following minimum information:

(a) Technical data sheet:

- Field of application:
- Building elements for which the penetration seal is suitable, type and properties of the building elements like minimum thickness, density, and - in case of lightweight constructions – the construction requirements.
- Limits in size, minimum thickness etc. of the penetration seal
- Construction of the penetration seal including the necessary components and additional products (e.g. backfilling material) with clear indication whether they are generic or specific.
- Services which the penetration seal is suitable, type and properties of the services like material, diameter, thickness etc. in case of pipes including insulation materials; necessary/allowed supports/fixings (e.g. pipe trays)

(b) Installation instruction:

- Steps to be followed
- Procedure in case of retrofitting
- Stipulations on maintenance, repair and replacement

ANNEX A – Resistance to Fire Classification – SOUDACOMPOUND FR

A.1 Rigid wall constructions according to 1.2.1 with wall thickness of minimum 150 mm

A.1.1 Cable penetration seal with 50 mm deep SOUDACOMPOUND FR backed with mineral fibre board

Penetration Seal: Cables fitted at any position within the aperture (min. separation 25 mm from seal edges), with min. 50 mm SOUDACOMPOUND FR to either side of the wall (or at any position in between), backed with min. 50 mm stone wool board min. 150 kg/m³.

Construction details:

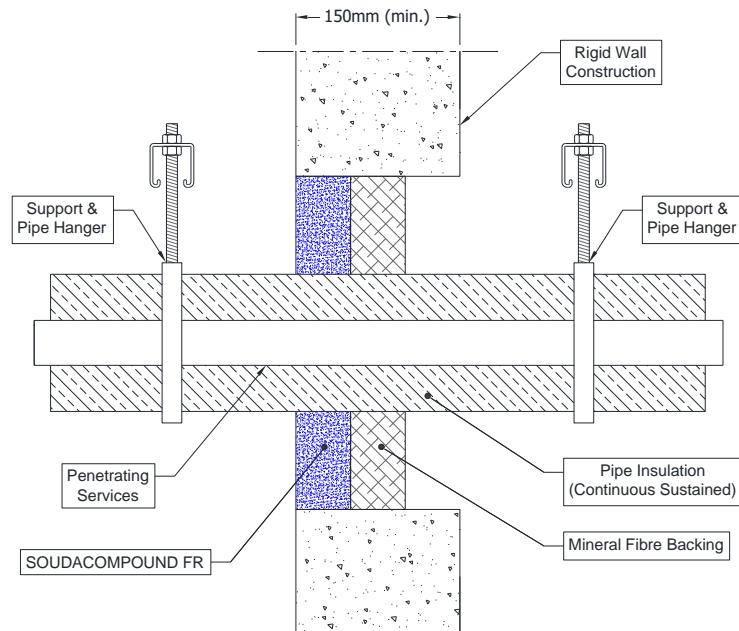

A.1.1.1 Single side penetration seal with cables

Services	Maximum aperture	Classification
None (blank)	As section 2. 4)	E 180, EI 120
Single electrical cables up to 21 mm Ø		E 180, EI 60
Single electrical cables up to 21 mm Ø	80 x 80 mm	E 240, EI 60
Electrical cables up to 21 mm Ø (single, bundled and on trays)		E 180, EI 60
Electrical cables up to 50 mm Ø (single, bundled and on trays)		E 180, EI 45
Electrical cables up to 80 mm Ø (single, bundled and on trays)		E 120, EI 45
Telecommunication cables up to 21 mm Ø (single or bundles up to 100 mm Ø)	As section 2. 4)	E 180, EI 90
Steel cable trays & ladders		E 180, EI 60
Non-sheathed wires up to 17 mm Ø		E 180, EI 45
Non-sheathed wires up to 24 mm Ø		E 180, EI 30
Copper conduits up to 16 mm Ø		E 180 C/U, EI 30 C/U
Steel conduits up to 16 mm Ø		E 180 C/U, EI 60 C/U
PVC conduits up to 16 mm Ø		E 180 C/U, E 180 C/C, EI 60 C/U, EI 60 C/C

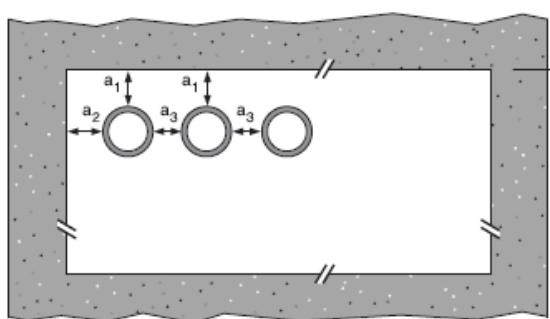

A.1.2 Pipe penetration seal with 50 mm deep SOUDACOMPOUND FR backed with mineral fibre board

Penetration Seal: CS (Continuous Sustained) insulated metallic pipes fitted at any position within the aperture (min. separation 30 mm from seal edges, with min. 50 mm SOUDACOMPOUND FR to either sides of the wall (or any position in between), backed with min. 50 mm stone wool min. 150 kg/m³.

PE pipes according to EN 1519-1, EN 12201-2 and EN 12666-1, ABS according to EN 1455-1 and pipes made from SAN+PVC according to EN 1565-1			
Up to 40 mm diameter/2.4-3.7 mm wall*	50 x 1.8 mm	1 & 2	EI 240 U/U
Up to 110 mm diameter/3.4-10 mm wall*	75 x 5.4 mm		EI 240 U/U
Up to 125 mm diameter/11.4 mm wall*	50 x 7.2 mm		EI 240 U/U
Up to 160 mm diameter/4.9-14.6 mm wall*	75 x 7.2 mm		EI 120 U/U

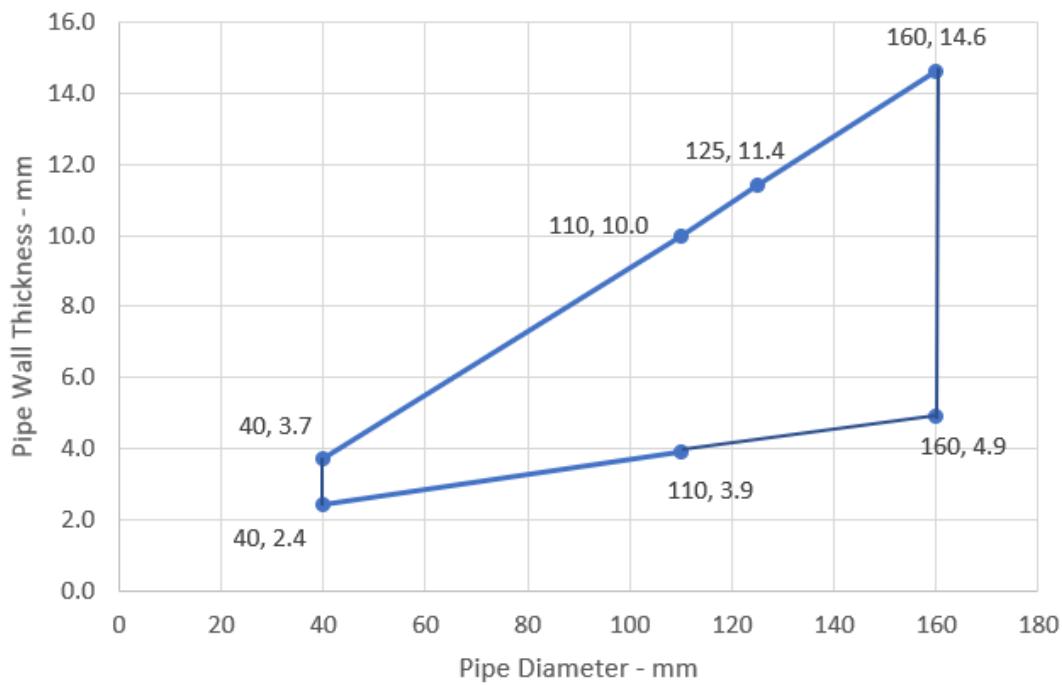

* Typical pipe diameters shown, see below graph for intermediate sizes

PP Pipes - E 120 U/U

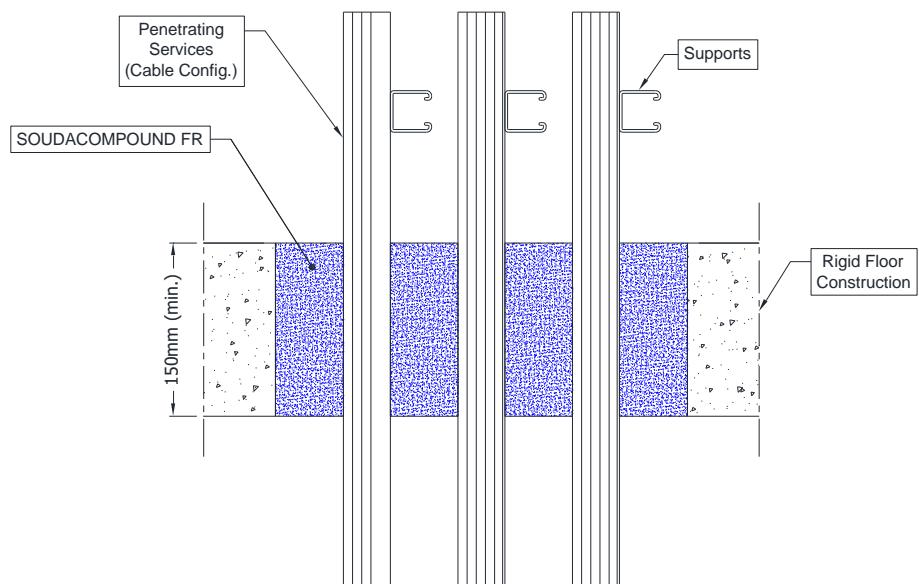

PE Pipes - EI 120 U/U

A.4.3 Cable penetration seal with 150 mm deep SOUDACOMPOUND FR

Penetration Seal: Cables fitted with SOUDACOMPOUND FR to either side of floor. Maximum seal size as section 2. 4) and minimum separation between cables and the edge of the seal of 30 mm.

Construction details:

A.4.3.1 Single side penetration seal with cables

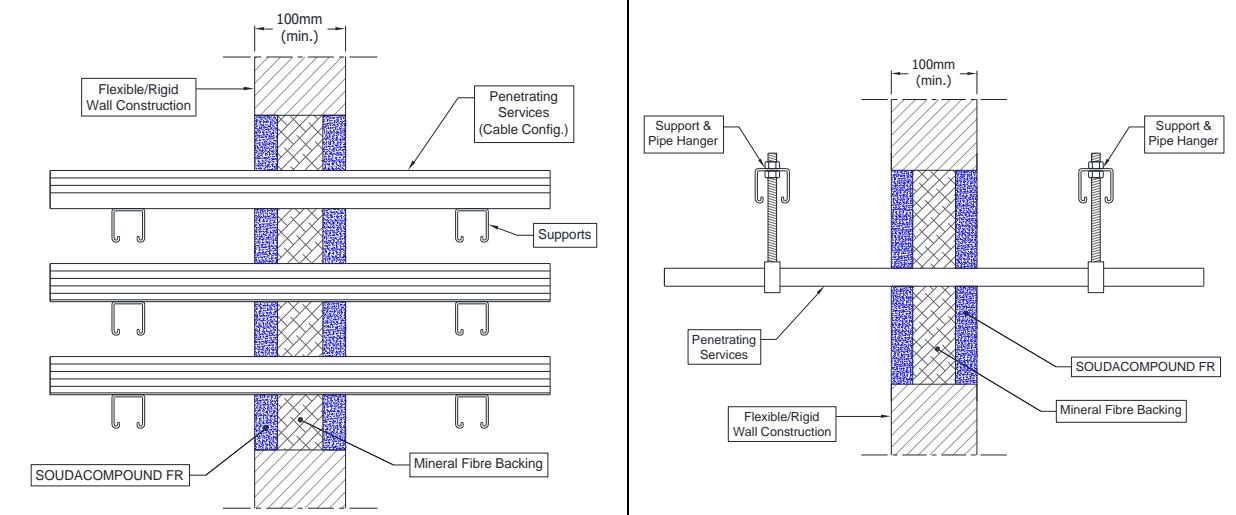

Services	Mortar depth	Backing	Insulation	Classification
Blank seals				EI 240
Electric cables up to 21 mm diameter, single or in a bundle.				E 240 EI 120
Steel cable trays and ladders up to 500 mm wide				E 240 EI 90
Electric cables 22-50 mm diameter, single or in a bundle.				E 90 EI 60
Electric cables 51-80 mm diameter, single or in a bundle.				EI 120
Unsheathed wire up to 24 mm diameter	Min. 150 mm	None	None	

A.5 Flexible and rigid wall constructions according to 1.2.1 with wall thickness of min. 100 mm

A.5.1 Cable penetration seal with 25 mm deep SOUDACOMPOUND FR to both faces backed with 50 mm mineral fibre board

Penetration Seal: Cables fitted at any position within the aperture (min. separation 25 mm from seal edges), with min. 25 mm SOUDACOMPOUND FR to both sides of the wall, backed with min. 1 x 50 mm or 2 x 25 mm stone wool board min. 150 kg/m³.

Construction details:

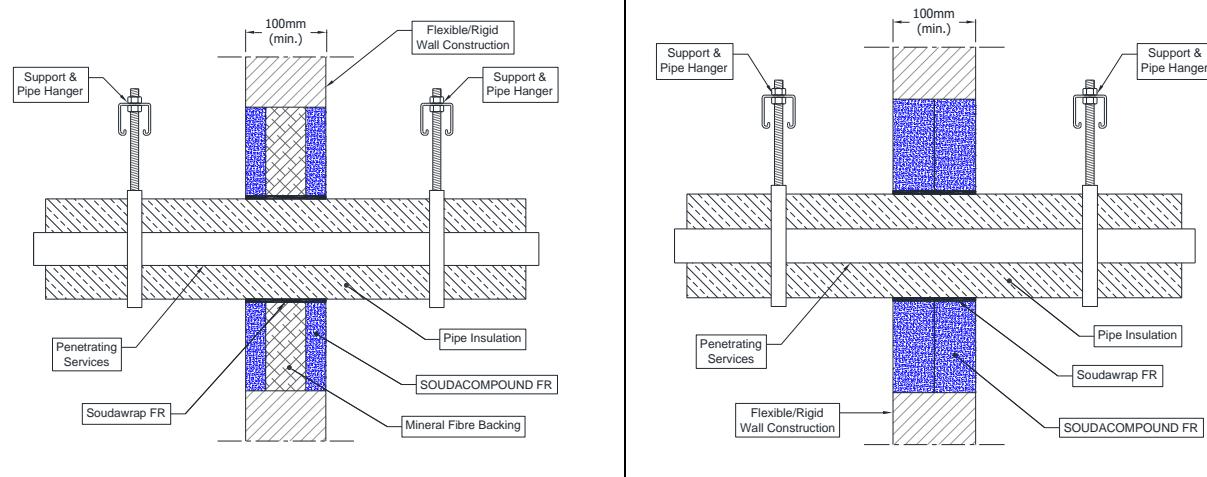

A.5.1.1 Double side penetration seal with cables

Services	Maximum aperture As section 2. 4)	Classification
None (blank)		EI 120
Single electrical cables up to 21 mm Ø (min.100 separation from other services)		E 120, EI 90
Electrical cables up to 80 mm Ø (single, bundled and on trays)		E 120, EI 60
Steel cable trays & ladders		
Steel conduits up to 16 mm Ø		E 120 C/U, EI 60 C/U
copper conduits up to 16 mm Ø		E 120 C/U, EI 45 C/U
Unsheathed wires up to 24 mm Ø		E 120, EI 45
PVC conduits up to 16 mm Ø		EI 120 C/U, EI 120 C/C

A.5.2 Pipe penetration seal with 25 mm deep SOUDACOMPOUND FR to both faces backed with 50 mm mineral fibre board

Penetration Seal: CS (Continuous Sustained) insulated metallic pipes fitted at any position within the aperture (min. separation 30 mm from seal edges), with min. 25 mm SOUDACOMPOUND FR to both sides of the wall, backed with min. 1 x 50 mm or 2 x 25 mm stone wool board min. 150 kg/m³ or min. 50 mm SOUDACOMPOUND FR to both sides of the wall without backing*. Soudawrap FR are required to be fitted to both faces of the seal.

Construction details:

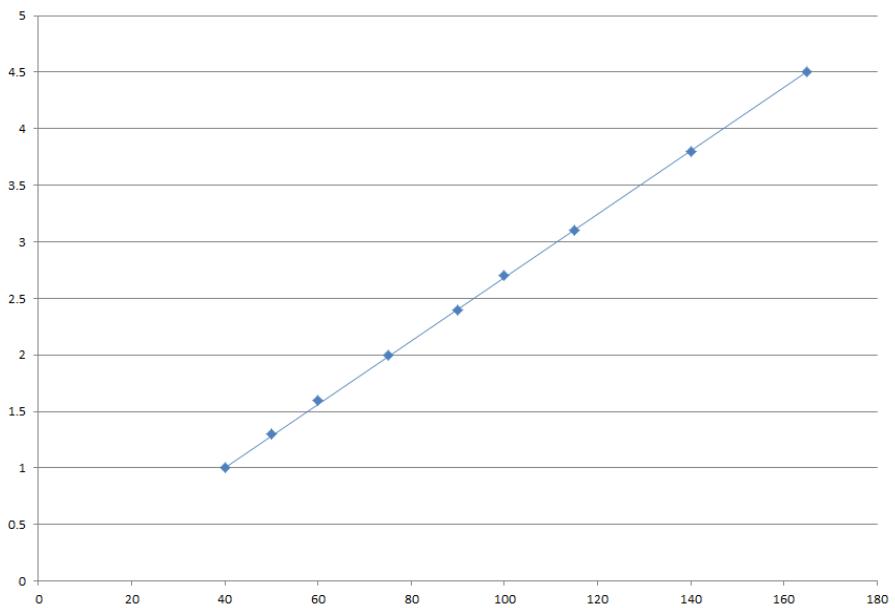

* Maximum seal size as section 2. 4)

A.5.2.1 Double side penetration seal with pipes

Services	Wrap	Insulation	Classification
Mild or stainless steel pipes			
40 mm diameter/1-14.2 mm wall	2 off 50 x 1.8 mm Soudawrap FR, one fitted flush to each face of seal		EI 120 C/U
40 mm diameter/1-14.2 mm wall*			
50 mm diameter/1.3-14.2 mm wall*			
60 mm diameter/1.6-14.2 mm wall*			
75 mm diameter/2-14.2 mm wall*			
90 mm diameter/2.4-14.2 mm wall*			
100 mm diameter/2.7-14.2 mm wall*	2 off 50 x 3.6 mm Soudawrap FR, one fitted flush to each face of seal	13 mm Elastomeric insulation minimum class B-s3,d0 or PE Foam insulation	E 120 C/U, EI 60 C/U
115 mm diameter/3.1-14.2 mm wall*			
140 mm diameter/3.8-14.2 mm wall*			
165 mm diameter/ 4.5-14.2 mm wall*			

* Typical pipe diameters shown, see below graph for intermediate sizes

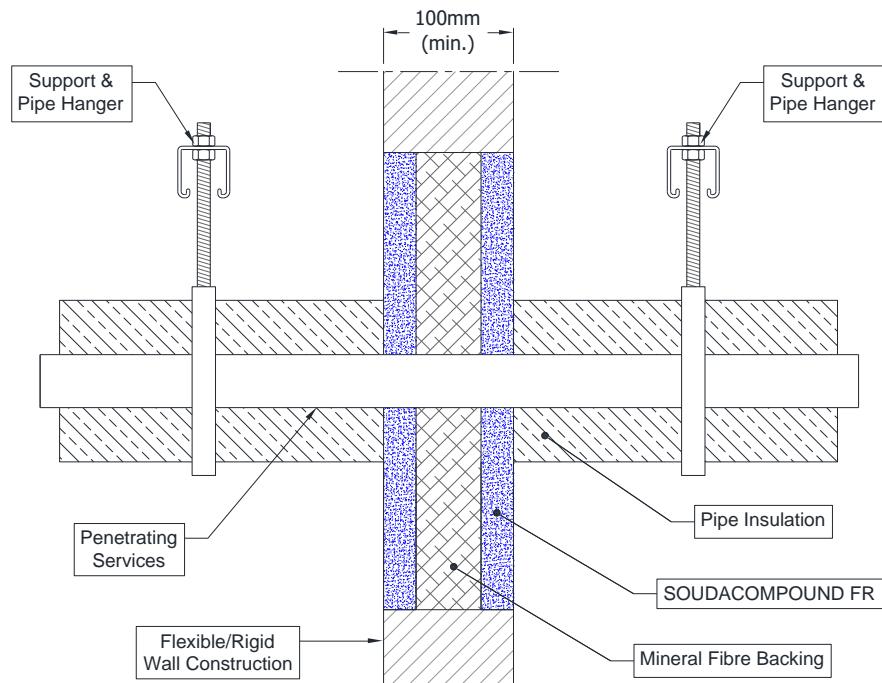

Pipe diameter vs Wall thickness

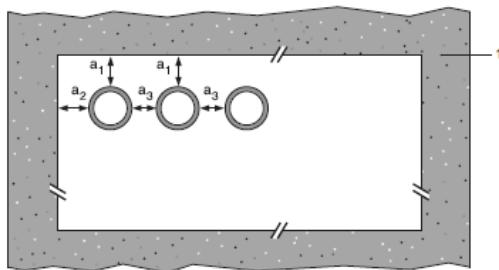

A.5.3 Pipe penetration seal with 25 mm deep SOUDACOMPOUND FR to both faces backed with 50 mm mineral fibre board

Penetration Seal: 500 mm (min.)* LI (Local Interrupted) or CI (Continuous Interrupted) insulated metallic (and composite) pipes fitted at any position within the aperture (min. separation 30 mm from seal edges), with min. 25 mm SOUDACOMPOUND FR to both sides of the wall backed with min. 1 x 50 mm or 2 x 25 mm stone wool board min. 150 kg/m³. Maximum seal size as section 2.4).

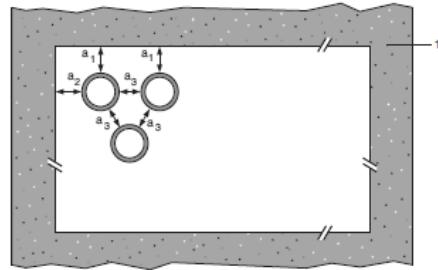

Construction details:
